

Monthly Report March 2022

Public Works Department

Streets/Parks:

The street department has been working diligently over the last couple snowstorms we have had move through the area. With the weather finally getting nice out, Ms. Sandy has been working to make sure the park is clean and presentable. We have been seeing an influx in citizens coming to the park.

Water/Sewer:

We have received several of the steel sleeves and pipe for the bond projects. We have had 12-15 truck loads thus far and several more and expected this week. We did have a hiccup in the water department this last month due to weather and had to move due dates for the water bills to March 15, however this has been straightened out and will be going back to the normal due date of the 10th next month.
