(EE) *Building permits.*

(1) *Building permit.* The city determines the valuation of a structure using the ICC Building Valuation Data Table. A copy of the table is available on the International Building Code's website at www.iccsafe.org/cs/techservices. The valuation table is updated every six months to provide an up-to-date "average" construction cost per square foot. For construction of new single family residential dwellings, the permit fee will be calculated based on heated square feet. Once the valuation is determined, the following table is used to calculate permit fees:

(a) Twenty-eight dollars and seventy-five cents (\$28.75) fee for any valuation of a structure that is \$3,000.00 or less.

(b) Twenty-eight dollars and seventy-five cents (\$28.75) fee for the first \$3,000.00 plus \$5.75 for each additional thousand or fraction thereof, to and including \$50,000.00, for any valuation of a structure that is from \$3,000.01 to \$50,000.00.

(c) Two hundred ninety-nine dollars (\$299.00) fee for the first \$50,000.00 plus \$4.60 for each additional thousand or fraction thereof, to and including \$100,000.00, for any valuation of a structure that is from \$50,000.01 to \$100,000.00.

(d) Five hundred twenty-nine dollars (\$529.00) fee for the first \$100,000.00 plus \$3.45 for each additional thousand or fraction thereof, to and including \$500,000.00, for any valuation of a structure that is from \$100,000.01 to \$500,000.00.

(e) One thousand, nine hundred nine dollars (\$1,909.00) fee for the first \$500,000.00 plus \$2.30 for each additional thousand or fraction thereof, for any valuation of a structure in excess of \$500,000.01.

(f) *Water and sewer tap and access fees.* Prior to the issuance of a building permit, all tap and access fees for the project site must be paid in full.

(g) *Residential single family building permit.* The purchase of a building permit for a residential single family home shall include the cost of all necessary permits to complete the construction as presented on the approved plans. Individual contractors must obtain permits for plumbing, electrical, mechanical and fence work. However, these permits will be issued at no charge if associated with a current building permit.

(h) *Permit box.* Ten dollars (\$10.00). All building permits (commercial or residential) shall require the purchase of a permit box.

(2) If work for which a permit is required by [Chapter 152](#), Subdivisions, is started or proceeded with, prior to obtaining said permit or other approvals required by ordinance, the fees specified herein and elsewhere in the Code of Ordinances shall be doubled, but the payment of such doubled fee shall not relieve any persons from fully complying with the requirements of [Chapter 152](#) and all applicable in the execution of the work, nor from any other penalties prescribed therein.

(3) *Plan checking fees.* When the valuation of the proposed construction is for a commercial use and exceeds \$1,000.00, and a plan is required to be submitted by the Code of Ordinances, a plan checking fee shall be paid to the Inspection Department at the time of submitting plans and specifications for checking. Residential plan checking fees apply to single-family dwellings with a valuation of \$500,000.00 or more. Said plan checking fee shall be equal to one-half of the building permit as set forth in the code.

(4) *Miscellaneous commercial permits.* Shell commercial structures will receive a final building permit upon approval of completion of the shell building and associated systems. Tenant improvement permits and interior remodeling permits will be issued based on the permit and plan checking fee schedule.

(5) *Miscellaneous residential and agricultural zoned accessory building permits.* Permit fees for sheds, pole barns, unattached garages and other like structures will be calculated using the following guidelines: for a structure without any utilities (plumbing, electrical or HVAC) consisting of pole type, wood or steel frame construction without a concrete floor, the permit fee shall be calculated at 25% of the square foot cost using the most current ICC building valuation data for utility group and VB construction type, not including the suggested 20% deduction for shell only buildings. Permit fees for structures with a concrete floor and wood or steel frame construction with no utilities shall be calculated at 35% of the ICC valuation using the same group and construction type. Permit fees for buildings with a concrete floor and wood or steel frame that include any utilities, (plumbing, electrical, HVAC) will be calculated at 45% of the ICC valuation.

(6) *Additions to commercial or residential buildings.* Fees for additions to commercial and residential buildings will be regarded as new construction for fee purposes.

If it is required, the city provides a card with a permit box at the time the permit is issued. The cards must be present in order for the Building Inspector to complete an inspection. In the event that the inspection card is lost, a replacement card/box may be issued for a fee of \$50.00.

(8) *Subcontractor stickers.* Subcontractor stickers are issued at the time the subcontractor pulls the required permit. These stickers are to be placed on the permit box.
